

Read about MSP in Indonesia!

TNC is partnering with Institut Teknologi Bandung and the Spatial Planning Directorate of Indonesia's Ministry of Marine Affairs to inform the government engagement process in Lesser Sunda. TNC and partners are also supporting the Savu Sea Marine Protected Area Development Project to address several important marine issues. Read more – [click here!](#)

Photo: Rinca Island, Indonesia. Hawksbill Turtle Soars above the Reef. With more coral and reef fish species than anywhere else in the world, the Coral Triangle is the epicenter of our planet's marine diversity. The Conservancy works with partners to establish and strengthen marine protected areas that are resilient in the face of global climate change and supports the regional Coral Triangle Initiative.
